- 2 General Relativity & Reissner-Nordström Background
- 3 Entangled Relativity
- 4 Results
- 5 Conclusion

Introduction

Einstein-Hilbert action:

$$S[g, \Psi] = \int \left(\frac{R}{2\kappa} + \mathcal{L}_m \right) \sqrt{|g|} d^4x \quad (1)$$

Entangled Relativity

Null Geodesics Analysis

Null Geodesics Analysis
